Table 18	Quarterly Gross Domestic Product at Factor Cost, by Industry, in Constant 1971 Dollars
Table 19	Annual Consolidated Expenditure Account, Implicit Price Indexes
Table 19A	Percentage Change in Annual Expenditure Deflators
Table 20	Annual GDP at Factor Cost by Industry, Implicit Price Indexes

Note: Table numbers are consistent with earlier years with the exception of Tables 1A and 19A which are new.

MAJOR CHANGES TO THE 1964 - 1983 BRITISH COLUMBIA ECONOMIC ACCOUNTS (BCEA)

The following is a summary of the major changes and improvements in both content and methodology that have been incorporated into the 1964-1983 British Columbia Economic Accounts:

1. An extensive, in-depth review of the sources and methods used in the BCEA was conducted in 1984, focusing particularly on the processes of quarterly allocation and deflation. A number of significant changes were made, which are detailed in the Revised Methodology for the British Columbia Economic Accounts.

2. Merchandise Imports from the Rest of Canada and Merchandise Imports from the Rest of the World have been disaggregated from Net Service Exports plus Residual Error. Previously all 3 items were contained in a single line in the Consolidated Expenditure Account.

3. The components of Labour Income, i.e., Wages and Salaries; Supplementary Labour Income; and Military Pay and Allowances, have been disaggregated.

REVISED METHODOLOGY FOR BRITISH COLUMBIA ECONOMIC ACCOUNTS (BCEA)

Over the last three years, the acquisition of statistical information from new sources and the development of new methods of estimating certain variables have made it necessary to revise the methodology of the British Columbia Economic Accounts.

The sources and methods used for each item of each account will be discussed in general terms, within the following framework:

I Basic Concepts and General Sources and Methods

- A. Conceptual Differences in Aggregate Income
- B. Measurement of Constant Dollar Gross Domestic Product (GDP)
- C. General Sources and Methods

II Consolidated Income & Expenditure Accounts and Sectoral Accounts

- A. Sources and Methods Used in the Annual Estimates
- B. Sources and Methods Used in Quarterly Allocation
- C. Sources and Methods Used in Deflation

III Gross Domestic Product by Industry and Activity

- A. Sources and Methods Used in the Annual Estimates
- B. Sources and Methods Used in Quarterly Allocation
- C. Sources and Methods Used in Deflation

IV Other Available Data

I Basic Concepts and General Sources and Methods

A. Conceptual Differences in Aggregate Income

- Gross National Product or GNP is the conventional measure employed at the national level and used by Statistics Canada to measure the sum total of all goods and services produced by Canadians during a particular year. It includes the income or expenditures of Canadians anywhere in the world.

- Gross Domestic Product, or GDP is the sum total of all goods and services produced within the boundaries of a country, region or province, for instance, British Columbia. It includes the goods and services produced in British Columbia by persons or companies resident anywhere in the world in a particular year.

- Because of the difficulty in measuring international and interprovincial flows of factor incomes and expenditures, the domestic (i.e., GDP) concept is used by all Canadian provinces. Therefore, for comparability with the British Columbia measure of GDP, Canadian GDP is used in Table 1. This is deflated by the Canadian Gross National Expenditure (GNE) deflator to arrive at constant dollar GDP for Canada.

B. Measurement of Constant Dollar GDP

- GDP at Market Prices (from the Consolidated Income and Expenditure Accounts) differs from GDP at Factor

Cost by Industry in that the latter excludes indirect taxes less subsidies. In theory, constant dollar GDE at Market Prices should equal constant dollar GDP at Factor Cost, with the effect of indirect taxes less subsidies removed through the deflation process. In practice, the process of deflation is imperfect, hence the sum of constant dollar GDP at Factor Cost for all industries does not normally equal constant dollar Gross Domestic Expenditures (GDE) at Market Prices. The difference, an unallocated residual derived from the deflation process, is included near the bottom of Tables 17 and 18.

C. General Sources and Methods

- Throughout this BCEA methodology, sources are referenced using Statistics Canada publication catalogue numbers, e.g. Cat. no. 39-211. The data actually used in the BCEA tables, however, is the most recent available data as derived from CANSIM, the Statistics Canada computer data base. Since CANSIM is updated on a daily basis while publications are released annually, quarterly or monthly, it often occurs that CANSIM contains more recent data than that of corresponding Statistics Canada publications.

- Throughout the B.C.E.A. tables, published data for items and sub-items of income and expenditure or of industries and sub-industries have been rounded to

the nearest million. Sub-totals and totals, however, have been arrived at by summing up unrounded items or components. Hence, on both the income and expenditure accounts and the industry accounts, items and components may not add up to sub-totals and totals due to rounding. For the same reason, quarterly data do not necessarily add up to annual totals.

- In the GDP by Industry tables, industries are defined according to the Statistics Canada Standard Industrial Classification (SIC) System. GDP by Activity groups primary industries with their related downstream manufacturing industries. In particular, Food and Beverages (excluding Fish Products) is grouped with Agriculture; Wood Products and Paper and Allied are grouped with Forestry; Fish Products is grouped with Fishing and Trapping; and Primary Metals, Non-Metallic Minerals and Petroleum and Coal Products are grouped with Mining under Metals, Non-Metallics and Petroleum, Gas and Coal respectively.

- In the Consolidated Expenditure Account (Table 1), Merchandise Exports and Imports to/from ROC signify B.C. exports and imports to/from the rest of Canada. Merchandise Exports and Imports to/from ROW signify B.C. exports and imports to/from the rest of the world, excluding Canada.

II Consolidated Income & Expenditure Accounts in Current & Constant Dollars & Sectoral Accounts

A. Sources and Methods Used in the Estimates

- Annual consolidated income and expenditure accounts data are provided to the Central Statistics Bureau by the GNP Division of Statistics Canada in advance of publication for evaluation and discussion. Following a series of consultations between the provinces and Statistics Canada, and possible revisions of data, the tables are released on CANSIM and published as Provincial Economic Accounts (Cat. no. 13-213).

- Data on B.C. and Canadian GDP per capita are based on Statistics Canada's Estimates of Population for Canada and the Provinces (Cat. nos. 91-001 & 91-201).

- Personal Income and Personal Disposable Income for British Columbia are derived from Statistics Canada estimates in Cat. no. 13-201.

- The structure and content of the annual income and expenditure account and government sector tables in the present publication are identical to those published by Statistics Canada, with a few significant exceptions. These are:

1. Consolidated Income Account

   (a) Supplementary Labour Income is separated from Wages & Salaries in the BCEA, using the monthly provincial supplementary labour income data from Statistics Canada's Estimates of Labour Income (Cat. no. 72-005).

   (b) Oil Export Charges and Payments to Importers of Crude Oil and Petroleum Products are not presented separately in the BCEA.

   (c) Capital Consumption Allowances are broken down into government and business sectors in the BCEA based on unpublished data from Statistics Canada.

2. Consolidated Expenditure Account

   (a) Personal Expenditures on Goods and Services are disaggregated into consumer goods and services in the Statistics Canada publication. In the BCEA, the category "consumer goods" is further disaggregated into durable, semi-durable and non-durable goods based on unpublished Statistics Canada data.

   (b) Value of Physical Change in Inventories in the Statistics Canada publication is broken down

into business, government and farm and grain in commercial channels. Since both government and farm and grain in commercial channels categories are very small for British Columbia, the item Value of Physical Change in Inventories is not disaggregated in the BCEA.

(c) Net Exports plus Residual Error is a single item in the Statistics Canada publication. In the BCEA, it is disaggregated into 5 items, viz.:

(i) Merchandise exports to the Rest of Canada

- The time series is based on the 1974 and 1979 Input-Output Model's B.C. merchandise exports to the rest of Canada, by category, as a proportion of B.C. manufacturing shipments. Non-manufacturing exports are calculated directly from data provided by the Ministries of Energy, Mines and Petroleum Resources, Forestry and Agriculture and Food.

(ii) Merchandise Exports to the Rest of the World

- The basic data source is B.C. Product Estimates by Commodity from the B.C. External Trade Report (BCETR) produced by the Ministry of Industry & Small Business

Development, supplemented by specific export data from the Ministry of Energy, Mines & Petroleum Resources, the Council of Forest Industries of B.C. and other sources.

(iii) Merchandise Imports from the Rest of Canada

- The time series is based on the 1974 and 1979 Input-Output Model using ratios of B.C. Merchandise Imports from the Rest of Canada as a proportion of Final Demand & Intermediate Demand.

(iv) Merchandise Imports from the Rest of the World

- The time series is derived by using the 1974 and 1979 B.C. Input-Output Model ratios of Imports from the Rest of the World to B.C. Imports through Customs Ports (from BCETR).

(v) Net Service Exports and Residual Error of Estimate

- As very little reliable information is available on B.C. service exports and imports, these items have been included

with the Residual Error of Estimate and together they reflect the difference between the Income Account GDP and the Expenditure Account GDE.

3. Sectoral Accounts

- Persons and Unincorporated Business Sector: Data used derive from the Statistics Canada publication Provincial Economic Accounts (Cat. no. 13-213), Table 10, with minor additions. Further detail found in the BCEA originates from unpublished Statistics Canada data.

- Government Sector: Data used in BCEA Tables 4, 5, & 6 derive from the Statistics Canada publication, Provincial Economic Accounts (Cat. no. 13-213), Tables 3 to 9. More detail is provided in the Statistics Canada publication.

- Corporate and Government Business Enterprises Sector: Some of the data used in BCEA Table 7 come from the Consolidated Income & Expenditure Accounts or from the Personal & Government Sectors discussed above. Other items such as interest on public and consumer debt; interest, dividends and miscellaneous investment income of non-residents of Canada; and interest, dividends and miscellaneous investment income payments are based on unpublished Statistics Canada data.

B. Sources and Methods Used in Quarterly Allocation

1. Consolidated Income Account

(a) Wages & Salaries & Supplementary Labour Income -both items available monthly from Statistics Canada (Cat. no. 72-008).

(b) Military Pay & Allowances - allocated based on the Canadian quarterly pattern

(c) Net Income of Non-Farm Unincorporated Businesses Including Rent - allocated based on the Canadian quarterly pattern

(d) Accrued Net Income of Farm Operators from Farm Production - allocated quarterly based on B.C. Farm Cash Receipts (Cat. no. 21-001)

(e) Corporation Profits before Taxes - allocated quarterly based on B.C. Ministry of Finance quarterly receipts of Corporate Income Tax Revenue, available from Quarterly Financial Reports back to 1976. For earlier years, the Canadian pattern is used

(f) Interest and Miscellaneous Investment Income - allocated quarterly based on the Canadian quarterly pattern

(g) Inventory Valuation Adjustment - allocated quarterly based on the Canadian quarterly pattern

(h) Capital Consumption Allowance - allocated quarterly based on the Canadian quarterly pattern

(i) Indirect Taxes less Subsidies - disaggregated into components, each with a corresponding quarterly allocator:

(i) Federal Customs Duties - current dollar Imports from the Rest of the World from the Expenditure Account

(ii) Federal Excise Taxes - B.C. Manufacturing Shipments in current dollars

(iii) Other Federal Indirect Taxes - overall Canada pattern

(iv) Provincial Sales Tax - quarterly estimate of Social Service Tax collections obtained from the Quarterly Financial Report (QFR) of the B.C. Ministry of Finance.

(v) Provincial Gasoline Tax - quarterly estimate of Motor Fuel Tax collections obtained from the QFR

(vi) Other Provincial Indirect Taxes - total provincial indirect tax collections, less Social Service & Fuel Taxes, quarterly from the QFR

(vii) Local Indirect Taxes - allocated equally to each quarter

(viii) Subsidies, Federal & Provincial - allocated based on the Canada pattern of subsidies

2. Consolidated Expenditure Account

(a) Personal Expenditures

(i) Durable, Semi-Durable and Non-Durable Goods - allocated separately on a quarterly basis using B.C. retail sales by kind of business, converted into types of goods based on an algorithm provided by Statistics Canada.

(ii) Services - allocated by the Canadian quarterly pattern, adjusted by the weighted ratio of B.C. to Canada Restaurant, Tavern & Caterer Receipts.

(b) Government Expenditures on Goods and Services

(i) Federal and Local - allocated by Canada quarterly pattern for each component.

(ii) Provincial - allocated by the quarterly operating expenditure estimates as published in the Quarterly Financial Report of the Ministry of Finance.

(c) Gross Fixed Capital Formation (GFCF)

(i) Government Residential Construction - allocated by the Canada quarterly pattern.

(ii) Government Non-Residential Construction - allocated using the Canadian Government Non-Residential Construction GFCF quarterly pattern, adjusted by the B.C. to Canada ratio of Non-Residential Building Permits.

(iii) Government Machinery & Equipment - allocated by the Canada quarterly pattern.

(iv) Business Residential Construction - allocated by the Canada quarterly pattern adjusted by the B.C. to Canada ratio of housing starts and the average unit value of residential permits.

(v) Business Non-Residential Construction - allocated using the Canadian Business Construction GFCF quarterly pattern, adjusted by the B.C. to Canada ratio of non-residential building permits.

(vi) Business Machinery & Equipment - allocated using the Canadian quarterly pattern.

(d) Value of Physical Change in Inventories - allocated using the Canadian quarterly pattern adjusted by B.C.-specific inventory levels by industry.

(e) Merchandise Exports to the Rest of Canada - allocated using the B.C. Manufacturing Shipments and Primary Goods Exports quarterly pattern weighted according to major commodities.

(f) Merchandise Exports to the Rest of the World - allocated using the quarterly pattern of Exports through B.C. Customs Ports by major commodity, from BCETR.

(g) Merchandise Imports from the Rest of Canada - allocated using a mix of personal expenditure and GDP by quarterly industry patterns.

(h) Merchandise Imports from the Rest of the World - allocated using the quarterly pattern of Imports through B.C. Customs Ports by major commodity, from BCETR.

(i) Net Service Exports plus Residual Error - GDP less GDE for each quarter.

C. Sources and Methods Used in Deflation

1. Personal Expenditures on Goods & Services

- Disaggregated into Durable, Semi-Durable and Non-Durable Goods and Services, these items are deflated separately by the use of B.C.-specific monthly Expenditure Deflators (BCED) with 1978 weights, provided for the purpose of provincial accounts deflation by Statistics Canada. Previous to 1978, the respective monthly Vancouver Consumer Price Index (CPI) components were used as deflators.

2. Current Government Expenditures on Goods & Services

- The Canadian Gross National Expenditure (GNE) quarterly deflator for the same item is used, adjusted by the B.C. to Canada ratio of Health, Education & Public Administration Wage Rates.

3. Gross Fixed Capital Formation (GFCF):

(a) Government Residential Construction

- The quarterly Canadian Government Residential Construction GNE deflator is used, adjusted by the B.C. to Canada ratio of the Index of Input Costs of Construction, from Construction Price Statistics (Cat. no. 62-007).

(b) Government Non-Residential Construction

- From the Statistics Canada B.C. Fixed Capital Flows & Stocks release, the Government Departments and Institutions Construction GFCF deflator is used. This deflator is then adjusted by the B.C. to Canada ratio of the Index of Input Costs of Construction, from Construction Price Statistics (Cat. no. 62-007). The quarterly pattern for the deflator is the Canadian pattern.

(c) Government Machinery & Equipment

- From the Statistics Canada Fixed Capital Flows & Stocks B.C. release, the Government Departments and Institutions Machinery and Equipment GFCF deflator is used. The quarterly pattern for this deflator is the Canada pattern.

(d) Business Residential Construction

- The quarterly Canadian Business Residential Construction GNE deflator is used, adjusted by the B.C. to Canada ratio of the Index of Input Costs of Construction, from Construction Price Statistics (Cat. no. 62-007).

(e) Business Non-Residential Construction

- From Statistics Canada's Gross Fixed Capital Flows & Stocks B.C. release, the Construction (excluding Government Departments & Institutions) GFCF deflator is used. This deflator is adjusted by the B.C. to Canada

ratio of the Index of Input Costs of Construction from Construction Price Statistics (Cat. no. 62-007). The quarterly pattern used is the Canadian pattern.

(f) Business Machinery & Equipment

- From Statistics Canada's Gross Fixed Capital Flows & Stocks B.C. release, the Machinery & Equipment (excluding Government Departments & Institutions) deflator is used. The quarterly pattern used is also the Canadian pattern.

4. Value of Physical Change in Inventories (VPC)

- Current dollar book values of inventories by industry for 1975 to 1983 were provided by Statistics Canada. Total book value levels for earlier years were then calculated. Each industry's book value of inventories was then deflated by that industry's annual deflator from the GDP by Industry Account, and summed to yield a total constant dollar book value. The constant dollar VPC is then the change in year to year constant dollar book value.

5. Merchandise Exports to the Rest of Canada

- Deflators for major commodities and the quarterly pattern of the deflators are derived from the respective Canadian Industry Price Indexes (Cat. no. 62-011).

6. Merchandise Exports to the Rest of the World
   - For the most part, quarterly Canadian value/volume export deflators (Cat. No. 65-004) were used for major export commodities, as well as data from the Ministry of Energy, Mines & Petroleum Resources.

7. Merchandise Imports from the Rest of Canada
   - The quarterly Canadian Industry Selling Price Indexes (Cat. no. 62-011) were used for major commodity groups.

8. Merchandise Imports from the Rest of the World
   - The quarterly Canadian Import Price Indexes (Cat. no. 65-007) were used for major commodity groups.

9. Net Service Exports and Residual Error
   - The overall B.C. Gross Domestic Expenditure deflator was used.

III Gross Domestic Product by Industry & Activity in Current & Constant Dollars

A. Sources and Methods Used in Estimating GDP by Industry

1. Gross Domestic Product for each of the major industries (except utilities) is the sum of the following income account components, viz.:

   (a) Wages and Salaries by Industry

   - Wages and salaries are available for B.C. by industry on a monthly basis from Statistics Canada (Cat. no. 72-008).

(b) Supplementary Labour Income

- Totals from Statistics Canada (Cat. no. 72-008) are disaggregated by industry based on the Canadian industrial pattern. Military pay and allowances are allocated entirely to Public Administration & Defence.

(c) Corporation Profits before taxes

- Annual estimates by industry are provided by Statistics Canada

(d) Miscellaneous Investment Income

- Miscellaneous investment income is allocated by industry on the basis of the Canadian industrial pattern of interest, dividends and miscellaneous investment income.

(e) Accrued Net Income of Farm Operators from Farm Production

- This component is provided by Statistics Canada and is allocated entirely to Agriculture

(f) Net Income of Non-Farm Unincorporated Business Including Rent

- Annual estimates by industry are received from Statistics Canada.

(g) Capital Consumption Allowances

- Annual estimates by industry are derived from Statistics Canada data.

(h) Inventory Valuation Adjustment
- Same as (g) above.

2. Utilities GDP is derived directly from Statistics Canada's Provincial Gross Domestic Product by Industry (Cat. no. 61-202).

3. Disaggregation into 4 mining sub-industries, i.e. Metal Mines, Coal, Petroleum & Natural Gas, and Non-metal Mining is accomplished by allocating B.C. total Mining GDP on the basis of B.C. Value Added for each sub-industry obtained in the form of a special release from Statistics Canada's Manufacturing and Primary Industries Division.

4. Disaggregation into 17 manufacturing sub-industries is accomplished by allocating B.C. total Manufacturing GDP on the basis of B.C. Value Added for manufacturing activity, by sub-industry, from Statistics Canada's Census of Manufacturing (Cat. no.31-203).

5. Community, Business & Personal Services is disaggregated into:

(a) Accommodation & Food Services
(b) Services to Business Management
(c) Other Commercial Services
(d) Education & Related Services
(e) Health & Welfare Services
(f) Other Non-Commercial Services

For (a) (d) & (e) above, annual GDP estimates are derived from Statistics Canada's Provincial Gross Domestic Product by Industry (Cat. no. 61-202).

For (b) (c) & (f) above, allocation of total Services GDP is based on Statistics Canada data for these sub-industries for several income components such as wages and salaries, capital consumption allowances, and net income of non-farm unincorporated businesses. The other components are estimated on the basis of wages and salaries proportions and relative Canadian proportions.

B. Sources and Methods Used in Quarterly Allocation

1. Agriculture - quarterly allocator based on Farm Cash Receipts (Cat. no. 21-001).

2. Forestry - quarterly allocator based on Timber Scaled from the B.C. Ministry of Forests and the quarterly B.C. Forestry Price deflator.

3. Fishing & Trapping - quarterly allocator based on monthly Value of Fish Landings from the Canada Ministry of Fisheries & Oceans

4. Mining - the quarterly allocation of the four sub-industries:

   (a) Metal Mining - quarterly allocator based on the quarterly value of production in metal mining,

from B.C. Ministry of Energy, Mines & Petroleum Resources.

(b) Coal - quarterly allocator based on the quantity of coal produced, data obtained from the B.C. Ministry of Energy, Mines & Petroleum Resources; and the quarterly deflator for coal.

(c) Petroleum & Natural Gas - quarterly sum of the values at the wellhead of crude oil and natural gas produced in B.C., from B.C. Ministry of Energy, Mines & Petroleum Resources.

(d) Non-Metal Mining - quarterly allocator based on the quarterly value of production in non-metal mining, from B.C. Ministry of Energy, Mines and Petroleum Resources.

5. Manufacturing - seventeen sub-industries, allocated quarterly on the basis of Statistics Canada's Value of Manufacturing Shipments (Cat. no. 31-203) in each sub-industry.

6. Construction - quarterly pattern from the sum of Government and Business Residential and Non-Residential Construction, Gross Fixed Capital Formation, from the Consolidated Expenditure Account.

7. Transportation, Communications and Storage - quarterly allocator based on wages and salaries in transportation, communications and storage.

8. Utilities - current-weighted quarterly allocator based on quarterly electricity production and the B.C. Electricity Selling Price Index (Cat. Nos. 62-011 and 57-001); and quarterly revenues from gas distribution (Cat. no. 55-002).

9. Wholesale Trade - quarterly allocator based on monthly B.C. Wholesale Sales (from Statistics Canada special release for 1981 to 1983) & B.C. Retail Sales (Cat. no. 63-005) for earlier years.

10. Retail Trade - quarterly allocator based on monthly B.C. Retail Sales (Cat. no. 63-005).

11. Finance, Insurance & Real Estate - allocated quarterly based on wages and salaries in finance, insurance and real estate.

12. Community, Business and Personal Services

    (a) Accommodation & Food Services - quarterly allocator is the B.C. Receipts of Restaurants, Caterers and Taverns (Cat. no. 63-011)

    (b) Services to Business Management - allocated on the basis of Canadian Real Domestic Product (RDP) in Services to Business Management (Cat. no. 61-213) and the Vancouver CPI for Services excluding rent.

(c) Other Commercial Services - allocated on the basis of Canadian RDP in Recreation & Other Commerical Services (Cat. no. 61-213) and the Vancouver CPI for Services excluding rent.

(d) Health & Welfare Services - allocated on the basis of wages and salaries in health and welfare services.

(e) Education and Related Services - allocated on the basis of wages and salaries in health, education and related services.

(f) Other Non-Commerical Services - allocated on the basis of wages and salaries in other non-commercial services.

13. Public Administration and Defence - allocated on a quarterly basis by wages and salaries in public administration and defence.

C. Sources and Methods Used in Deflation

1. Agriculture

- The annual deflator for Agriculture GDP is derived from Statistics Canada's Provincial Gross Domestic Product by Industry (Cat. no. 62-203).

The annual deflator is allocated quarterly based on the Index of Farm Prices of Agricultural Products (Cat. no. 62-003).

2. Forestry

- The deflator used is based on value/volume of shipments from Logging, (Cat. no. 25-201). The quarterly pattern of the deflator is derived from the B.C. Industry Price Index for Sawmills (Cat. no. 62-011).

3. Fishing & Trapping

- As with Agriculture, the Fishing deflator derives from Statistics Canada's Provincial Gross Domestic Product by Industry (Cat. No. 62-203). The quarterly pattern of the deflator is derived from the Bank of Canada Export Price Index for Fish & Fish Products.

4. Mining

(a) Metal Mines

- For 1978 to the present, quarterly minehead prices from the B.C. Ministry of Energy, Mines & Petroleum Resources are used for the major metals; previous to 1978, average quarterly international prices for gold, silver, lead, zinc, copper and molybdenum weighted by current values of production are used.

(b) Coal

- The deflator used is based on value/volume of coal products from the B.C. Ministry of Energy, Mines & Petroleum Resources. Quarterly allocation of the deflator is based on the Canadian Export Price Index for Coal (Cat. no. 65-004).

(c) Petroleum & Natural Gas

- The deflator used is based on the weighted value/volume for crude oil and natural gas from the B.C. Ministry of Energy, Mines & Petroleum Resources. The quarterly pattern of the deflator derives from the Export Price Indexes for Crude Oil and Natural Gas (Cat. no. 65-004).

(d) Non-Metal Mines

- B.C. annual unit prices of asbestos, cement and sand and gravel, from the B.C. Ministry of Energy, Mines & Petroleum Resources, current-weighted by annual production are used as the deflator. The quarterly pattern of the deflator is from the Canadian Industry Price Indexes for Asbestos and Cement.

5. Manufacturing

- For all manufacturing sub-industries, the annual deflators used are based on the GDP Implicit Price Indexes for each sub-industry from Statistics Canada's Provincial Gross Domestic Product by Industry (Cat. no. 61-202). The Canadian Industry Price Indexes (Cat. no. 62-011) are used for each deflator's quarterly pattern.

6. Construction

- The deflator used is the quarterly deflator for Business and Government Residential and Non-Resi-

dential Construction Gross Fixed Capital Formation, from the Consolidated Expenditure Account.

7. Transportation Communications & Storage
   - The deflator used is based on the B.C. Expenditure Deflators (BCED) for Transportation and Communications - related components, and on the Canadian Implicit Price Index for Transportation, Communications and Storage (Cat. No. 61-213). Quarterly allocation of the deflator is based on the B.C. Expenditure Deflators (BCED) and the Vancouver CPI for Transportation.

8. Utilities
   - The deflator used is the B.C. Implicit Price Index for Electric Power, Gas and Water from Provincial Gross Domestic Product by Industy (Cat. no. 61-202). The quarterly pattern of the deflator is based on the B.C. Electricity Selling Price Indexes (Cat. no. 62-011) and the Vancouver CPI for electric power.

9. Wholesale Trade
   - The monthly Vancouver CPI for Goods is used as the deflator (Cat. no. 62-010).

10. Retail Trade
   - The weighted quarterly B.C. Personal Expenditures deflators for Durable, Semi-durable and Non-durable goods from the Expenditure Account are used.

11. Finance Insurance & Real Estate -

- The deflator used is the Canadian Implicit Price Index for Finance, Insurance and Real Estate (Cat. nos. 61-213 and 13-201). The quarterly pattern of the deflator is based on the Finance, Insurance and Real Estate components of the B.C. Expenditure Deflators (BCED) and the Canadian CPI.

12. Community, Business and Personal Services

(a) Accommodation and Food Services

- The deflator used is the B.C. GDP Implicit Price Index for Accommodation and Food Services from Statistics Canada's Provincial Gross Domestic Product by Industry (Cat. no. 61-202).

For the quarterly pattern of the deflator, the Accommodations and Food Services components of the B.C. Expenditure Deflators (BCED) and the Vancouver CPI are used.

(b) Business Services to Management

- The deflator used is the Canadian Implicit Price Index for Services to Business Management (Cat. no. 61-213). The quarterly pattern is based on the B.C. Expenditure Deflators (BCED) and the Vancouver CPI for Services.

(c) Other Commercial Services

- The deflator used is based on related components of the B.C. Expenditure Deflators (BCED) and Vancouver CPI for Services.

(d) Education & Related Services

- The deflator used is the B.C. Implicit Price Index for Education & Related Services (Cat. no. 61-202). Quarterly allocation of the deflator is based on the Vancouver CPI for Education (Cat. No. 62-010).

(e) Health and Related Services

- The deflator used is the B.C. Implicit Price Index for Health and Welfare Services (Cat. no. 61-202). Quarterly allocation of the deflator is based on the B.C. Expenditures Deflators (BCED) and the Vancouver CPI for Health and Dental Care.

(f) Other Non-Commercial Services

- The deflator used is the Canadian Personal Expenditures Implicit Price Index for Operating Expenses of Non-Profit Organizations (Cat. No. 13-201). The quarterly pattern of the deflator is derived from the Personal Expenditures on Services deflator from the Consolidated Expenditure Account.

13. Public Administration & Defence -

(a) Federal: The Canadian Implicit Price Index for Federal Administration (Cat. no. 61-213) is used as deflator.

(b) Provincial and Local: The B.C. Implicit Price Index for Provincial and Local Administration (Cat. no. 61-202) is used as deflator.

The above deflators are weighted according to wages and salaries in each level.

For quarterly allocation of the deflator, the B.C. Wage Rate Index for Public Administration is used.

IV Other Available Data

In addition to the basic statistical tables contained in this publication users may obtain the following data series on request:

(a) Quarterly Implicit Price Indexes, Consolidated Expenditure Account

(b) Quarterly Implicit Price Indexes, GDP by Industry Account

(c) Real Output per Worker and per Worker Hour, by Industry, Annual, in Index form.

(d) Unit Labour Costs by Industry, Annual, in Index form.

(e) Hours Worked by Industry, Total, Average Weekly, and Average Annual

(f) Labour Compensation per Worker and per Worker Hour, by Industry Annual

(g) Merchandise Exports to the Rest of Canada and the Rest of the World, by Major Category, Annual & Quarterly

(h) Merchandise Imports from the Rest of Canada and the Rest of the World, by Major Category, Annual & Quarterly

(i) Components of GDP at Factor Cost by Industry, Annual & Quarterly.

The Central Statistics Bureau welcomes questions and comments from researchers on the British Columbia Economic Accounts methodology, sources and data. Such questions and comments should be directed to:

Dr. Oscar Perez de Tagle

NOTE: (1) Provincial investment income includes oil and gas royalties (national accounts definition)
(2) Personal income tax revenues were affected by federal-provincial transfer of tax points in 1977 and 1978, and a reduction in the provincial rate in 1979
(3) Provincial indirect tax revenues were affected by reductions in the social services tax rate in 1978 from 7% to 5% and in 1979 from 5% to 4%

* Note: Starred items combine primary activity and dependent (or related) manufacturing activity.
Agriculture includes food and beverage (excluding fish products).
Forestry includes wood products and paper and allied products.
Mining includes primary metals, petroleum, gas & coal, and non-metallic mineral products.
Other manufacturing includes non-resource based manufacturing industries.
